

FEEDING *Our Future*

Feeding Our Future is a transformative initiative designed to empower and educate the next generation of urban farmers. This 20-week program offers a unique opportunity for individuals ages 16–25 to immerse themselves in the world of hydroponics.

Join us and gain hands-on experience in every aspect of indoor farming, from planting and growing to harvesting and maintaining crops. Alongside practical farming skills, you'll receive invaluable business coaching to equip you with the tools needed to succeed in the agricultural industry.

What You'll Learn:

- **Hydroponic Farming:** Master the techniques for growing microgreens, herbs, and lettuce in a controlled, soil-free environment.
- **Farm Operations:** Learn how to run and maintain a hydroponic farm, including system management and crop care.
- **Business Skills:** Gain insights into starting and managing a small business within the agricultural sector.

Compensation provided at an hourly wage:
\$18/hr
